RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

While the past several years have seen tough economic times for all Americans, they've been especially challenging for Michiganders. Today's Michigan is experiencing significant upheaval as we transition from a struggling twentieth century manufacturing economy to becoming a leader in creating the high tech, high wage jobs needed to fuel America's future.

I'm writing to you today in connection with your review of the proposed merger between Comcast and NBCU. As Mayor of Westland, I've been privileged to partner with some of the top corporate innovators helping reenergize our state and I'm pleased to tell you Comcast is right at the front of the line. Since 2008, Comcast has invested nearly \$80 million in the Westland area, creating and sustaining jobs and building out our area's technological infrastructure. These investments have included construction of a 10,000 square foot call center and beneficial upgrades throughout Comcast's local network. Even in midst of the "Great Recession," Comcast has invested \$165 million state-wide and continues to employ talented hard-working men and women across Michigan.

Importantly, the infrastructure improvements made by Comcast will no doubt have job-creating ripple effects, not only here in Westland but in the entire Midwest region. I cannot overstate how refreshing Comcast's investments have been for our community's psyche.

I applaud Comcast as a good corporate citizen and urge you to keep this in mind as you consider their proposed merger with NBCU.

Warm regards,

Hon. William Wild
Mayor of Westland, Michigan

RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

I am writing to you today on the subject of the Comcast-NBC joint venture. Comcast has had a strong presence in our borough for over 35 years now, bringing jobs and innovation to our neighborhoods and diverse communities.

By way of background, the Borough of Baldwin has a population of approximately 20,000 people over 5 square miles. Comcast has operated a service center and lobby location in our borough since 1982, not only bringing jobs to our community but also providing valuable assistance to consumers.

Importantly, Comcast's role in our community goes well beyond being an employer. Comcast has committed to dedicating fifty volunteers for 250 hours of service to our neighborhoods. In late April, these Comcast volunteers cleaned, mulched and painted at one of our parks and rebuilt our basketball court. This dedicated community spirit is a valuable commodity and all too rare in today's corporate world. The company also participates in community events such as the annual Halloween parade.

Comcast has become an essential member of our community and we are certain our partnership with the company will continue long after Comcast has joined with NBC.

Sincerely,

BOROUGH OF BALDWIN

RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

The Pennsylvania Association of Latino Organizations (PALO) is a statewide trade organization representing Latino community based organizations across the Commonwealth of Pennsylvania. Representing well established as well as emerging organizations that provide frontline social services and community development activities within the Latino community, PALO plays an important role in advocating and educating the private and public sectors about the issues affecting the growing Latino community in Pennsylvania.

Comcast is a strong supporter of our efforts. It is gratifying to us to see a company that clearly understands the issues of inclusion and diversity.

Americans today, especially in the Latino community, need to focus on keeping up with new technologies. It is no secret that a digital divide continues to exist in which too many of us still don't understand how to use or benefit from the Internet. Comcast is now a partner with several of our member organizations, working with some on technology and bilingual skills development to make certain that members of our community develop the necessary computer and Internet skills that will help them find high quality twenty-first century jobs.

Comcast also has helped provide Spanish language television to the Lancaster area. These channels provide a valuable linguistic and cultural bridge for the Latino community and is further evidence that Comcast is a company that understands that America is like a **quilt**—many colors, many sizes, all woven together.

It's reassuring that Comcast not only realizes that we need to end the digital divide but is creating innovative initiatives to see this effort through to completion. Based on our experience we believe Comcast proposed transaction with NBC Universal will result in even more opportunities for community involvement and technological development.

Sincerely,

Carlos Graupera
Chairman
Board of Directors

Re: MB Docket No. 10-56

June 1, 2010

Chairman Genachowski:

The Better Business Bureau of Southern Colorado services 25 counties and maintains reports on more than 30,000 area businesses. We grade Comcast as an "A" business here, and I am hopeful you will consider my comments as you review Comcast's proposed partnership with NBC Universal.

Our mission is to facilitate an ethical marketplace where buyers and sellers can trust each other. We focus on creating a community of trustworthy businesses, setting standards for marketplace trust, encouraging and supporting best practices, celebrating marketplace role models, and denouncing substandard marketplace behavior. Our work centers around the values of excellence, integrity, teamwork, trust and respect.

Comcast is an important partner in our mission. The company is a regular participant in many of our organizational events, and our CEO has appeared on Comcast's local Newsmakers program to spotlight our work.

In addition to helping strengthen the business climate in Southern Colorado, Comcast also contributes to the welfare of our citizens. From its support for local charities and its donation of services to schools and libraries to its economic impact through employment and tax revenue, Comcast demonstrates daily that it is invested in the communities of Southern Colorado.

I hope you will take into account the work Comcast does in Southern Colorado and across the nation as you consider the pending transaction.

Start With TrustSM

Sincerely,

RE: MB Docket No. 10-56

Dear Chairman and Commissioners:

I am writing to explain how Comcast has helped the Center for Family Services (CFS) support the people of southern New Jersey and urge you to approve its proposed venture with NBC Universal.

The Center is a nonprofit human services agency with over 85 years of experience serving youth and families in southern New Jersey. We offer more than 40 programs that provide tools to help people live happier, healthier lives. At CFS, we are dedicated to providing a comprehensive continuum of care to meet the community's changing needs. We assist families in overcoming challenges and strengthening family ties, offer children a safe home when they have nowhere else to go, and educate and create awareness in our communities and schools. These efforts include family counseling, shelter and support for victims of abuse, substance abuse treatment and counseling, and 24 hour response services for homeless mothers and victims of sexual and domestic violence. In short we are the helping hand for those who have lost hope or have nowhere else to turn.

Comcast has been an important friend in carrying out our critical mission. We have been a partner for several years with the company as part of its Comcast Cares Day, during which hundreds of Comcast employees volunteer their services. It means a great deal that Comcast participates in the important work we do for individuals and families in southern New Jersey.

I strongly believe that Comcast's record of service to the community, which I've personally witnessed, is a strong indicator of the values of this company and its leadership.

I hope you will keep these efforts in mind as you review this proposal.

Sincerely,

Merilee Rutolo

Re: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

As Executive Director of The Second Mile Central Pennsylvania Region, I am submitting this letter regarding the proposed Comcast-NBC joint venture. I appreciate the Commission for reading my comments and I trust that my comments will be useful.

The Second Mile is a statewide 501 C-3 organization serving children in every county either through prevention, early intervention and/or community-based care programs and services. My area, central Pennsylvania (20 counties) provides more than 30,000 children with free services annually. Our organization has a State Board of Directors, Central, Southcentral and Southeastern Regional Board, each with 25 to 40 voluntarily members. Our main recourse for program referrals comes from more than 1,500 guidance counselors, teachers and health care professionals throughout the state.

We are appreciative that Comcast has a proven commitment to children's programs in our schools and communities. For a number of years, Comcast has been a generous donor to support our programs ensuring that our efforts thrive and services expand. Additionally, Comcast has provided in-kind services for The Second Mile to inform viewers on our foundation as a thirty-five plus year old organization that has experienced tremendous growth and relevance in our schools, communities and families.

Like The Second Mile, Comcast has established a tradition of commitment to improve the lives of children throughout our community and beyond. For that, we endorse their continued growth and prosperity as a valued donor and participant in our mission to improve our opportunities for children to reach their potential and achieve their dreams.

Thank you again for taking account of public comments during your review of this complex transaction.

Sincerely yours,

Henry R. Lesch, Executive Director
